

# What's Next With My Solar Installation?

Installation of all your solar equipment is complete!

Your Envoy system monitor needs to connect to the internet:

- *Already done!*
- *We will connect it later*

Your system must be inspected by the building department. You do not need to be home for the inspection. The inspection is scheduled for:

After the building department inspection is complete, we'll pick up the ladder & permit, and notify the utility.

Your utility will inspect the system in 2-6 weeks. If your solar is in an area with access issues (animals or a locked gate), they should contact you to arrange access.

Once your utility inspection is complete (you'll see a new solar meter for most utilities, or a "Cogeneration" sticker for SSVEC), you can turn the system on! See the other side for instructions!
